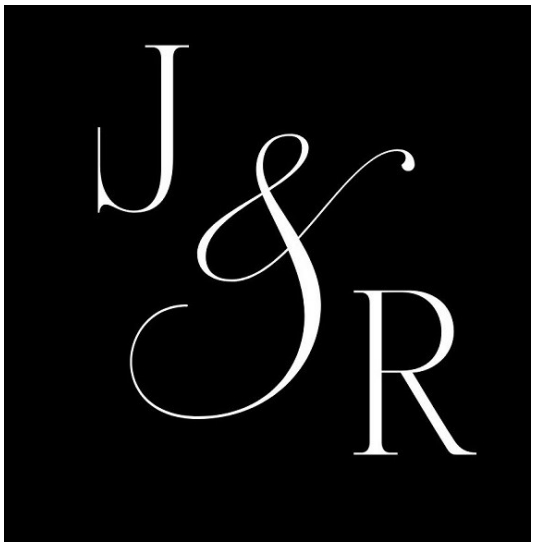
How Does It Work?

A reverse image is created. Our high-quality projectors display that image on a surface. The ***white*** areas within the image allow light from the projector's lamp to shine through. ***Black*** areas of the image block the light and do not allow it to pass-through.



Select Your Design

Browse through the catalog and select the design that best matches your event's theme or look you wish to "*project*" to your guests. Simple edits are included within your price. We will contact you to confirm the spelling of names and the order of the initials.

If you have artwork that you would like us to incorporate into your monogram, please email those files to dpdjgobo@gmail.com. A fee may apply.

Custom monogram projections are available! Please ask us for a quote.
Any questions? Please email dpdjgobo@gmail.com

Thank you and Congratulations!
